

September 22, 2006

Dear Amulet Customer,

As part of our commitment to making Amulet's complete product line RoHS compatible, we would like to notify all current and future customers that by 1/31/2007 all of Amulet's chips will be available in RoHS packages only.

Amulet Technologies is committed to adhering to the RoHS (Restrictions on Hazardous Substances) regulation issued by the European Union (EU) and Asia, for the purpose of eliminating certain environmentally hazardous materials used in the manufacture of electrical and electronic devices. As of July 2006, companies not in compliance with RoHS standards are unable to sell their products in EU and Asian member countries.

IMPORTANT INFORMATION

| | |
|-------------------------------------|--|
| Old Part Number: | AGB64LV01-QC (non-RoHS) |
| New Part Number: | AGB64LV01-QC-E (RoHS compliant) |
| Date RoHS Chip Available: | Immediately |
| LTB Date for non-RoHS parts: | 10/31/06 |
| Date Non-RoHS Chips are EOL: | 1/31/07 |

Please note ALL current and future Amulet Technologies chips will ONLY be available in RoHS versions after 12/29/06. The RoHS-compliant chip (AGB64LV01-QC-E) is currently available through distribution. We recommend purchasing sample quantities for prototyping with the RoHS chip. If your company requires a Last-Time-Buy (LTB) of the old P/N (AGB64LV01-QC), please contact Amulet immediately, latest by 10/31/06, with your request. This old P/N will be available only while supplies last through distribution up to 10/31/06 as well.

The RoHS-compliant chip (AGB64LV01-QC-E) is a pin-compatible product, however, due to the new manufacturing process, a customer moving from the old chip to the new chip may potentially require two circuit board changes from earlier designs. The new manufacturing process was completed to increase the programming speed while in Program Mode. There are no software changes moving to the RoHS chip. For technical details, please see the APPLICATION NOTE 101 on Amulet's website.

Questions? Please don't hesitate to contact your local Amulet manufacturers representative or Amulet at Sales@AmuletTechnologies.com / (408) 244-0363 ext.105/106

Best regards,
Amulet Technologies
