

Antenova's gigaNOVA<sup>®</sup> standard antennas - dedicated to wireless technologies.

Antenova, the integrated antenna and RF solutions company, offers the gigaNOVA<sup>®</sup> range of market leading standard antenna solutions for 2.3 GHz, 2.4 GHz, 2.5 GHz, 5 GHz, GPS, GSM and ISM900 bands. Designed for ease of integration into wireless devices, they are the smart choice for GPS, Bluetooth<sup>®</sup>, Wi-Fi<sup>®</sup>, ZigBee<sup>®</sup>, WiMAX<sup>™</sup> and cellular M2M applications.

No matter how impressive the design and performance of wireless components, effective communication can only be achieved with the right antenna.

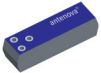

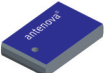

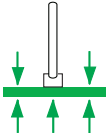

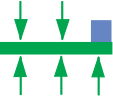

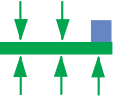

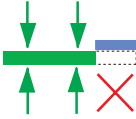

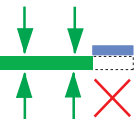

Antenova offers a full range of development support and RF testing to help reduce customization, design costs and accelerate your time to market.

Make Antenova your partner of choice from new product development through the full lifecycle of your product.

Implementation support				Contact us											
Antenova recommends our customers to use our know-how when it comes to implementing the antenna. We can offer advanced measuring equipment, custom tuning and technical support to obtain a secure and reliable implementation.
